

Dear neighbors,

My name is Sarah Liguori, and I'm honored to represent Legislative District 5 (formerly LD28) in the Arizona House of Representatives, where I have lived for the past 16 years. I am an Arizona native, a mom to two precious toddlers, and a longstanding leader in business and non-profit groups. I ended up serving my community at the State Capitol not because I was looking to become a politician, but because I am a concerned citizen who stood up when our community needed someone to take action. Simply put, I follow my values and I show up.

The first thing you should know about me is that I am a doer. My career experience in real estate and finance is anchored in my desire to help people build a better future. And my successes at the Capitol over this past year reflect this. As a freshman lawmaker, I have taken on leadership roles in the Water and Energy space, specifically with my rainwater harvesting bill and with an appointment to the Ad Hoc Committee on Energy. I have built solid relationships with other members by listening and fostering bipartisan discussions, all while standing firm in my Democratic values to push back strongly against the corruption, hate and fear being sewn into some of our legislation.

I know my job at the Capitol is to make a difference by bringing real solutions to the table that make our state more inclusive, equitable, and sustainable. This is my vision as your House Representative:

- *We allow people and families to make private decisions about their own health care.*
- *We address climate change and our water crisis NOW.*
- *We fund our public schools. We invest in our children.*
- *We address income inequality and recognize that we cannot succeed at the expense of others failing.*
- *We give our LGBTQ community the respect they deserve.*
- *We do not shy away from addressing systemic racism in our society. We fight for equity, equality and justice.*

I have been outspoken this session about creating a reality where we legislate *for the betterment of people's lives* and put the people's needs at the forefront of our decision making. With another term as your Representative, I will keep working for you to improve our community and our state together. **This is why I am running: to bring logic, empathy, and equity to our governance. To continue making a difference for all of you, my neighbors and constituents.**

Thank you in advance for trusting me with your vote,
